Extension order

63. (1) Subject to subsection (4), if, at any time before the expiry of an order with respect to any goods made under this subsection, subsection 55(1) or section 60 or under subsection 5(3), (3.2) or (4.1) of the *Export and Import Permits Act*, it appears to the satisfaction of the Governor in Council, as a result of an inquiry made by the Canadian International Trade Tribunal under section 30.07 of the *Canadian International Trade Tribunal Act*, that

(*a*) an order continues to be necessary to prevent or remedy serious injury to domestic producers of like or directly competitive goods, and

(*b*) there is evidence that the domestic producers of like or directly competitive goods are adjusting, as determined in accordance with any regulations made under paragraph 40(*b*) of the *Canadian International Trade Tribunal Act*,

the Governor in Council may, on the recommendation of the Minister, make an extension order imposing a surtax on any goods specified in the previous order imported from any country specified in the extension order.

(*b*) the rate of the surtax imposed by the extension order must, subject to subsection (3),

(i) be at a rate specified in the extension order, or

(ii) be at a rate specified in the extension order that varies from time to time as the quantity of the goods imported into Canada or that region or part of Canada during a period specified in the order equals or exceeds totals specified in the order.

Maximum rate

(3) The rate specified in the extension order may not exceed

(*a*) the lowest of any rates previously imposed with respect to the goods under subsection (1) or 55(1) or section 60; and

(*b*) the rate that in the opinion of the Governor in Council is sufficient to prevent or remedy serious injury to domestic producers of like or directly competitive goods and to facilitate the adjustment of the domestic producers.

Exception for goods imported from a free trade partner

(4) An order made under subsection (1) may apply to goods imported from a free trade partner only if it appears to the satisfaction of the Governor in Council, on the basis of a report made under the *Canadian International Trade Tribunal Act*, that

(*a*) the quantity of those goods represents a substantial share of the total imports of goods of the same kind;

(*b*) in the case of goods imported from a NAFTA country, the quantity of those goods, alone or, in exceptional circumstances, together with the quantity of goods of the same kind imported from each other NAFTA country, contributes importantly to the serious injury or threat of serious injury to domestic producers of like or directly competitive goods; and

(*c*) in the case of goods imported from any other free trade partner, the quantity of those goods contributes importantly to the serious injury or threat of serious injury to domestic producers of like or directly competitive goods.

Period and repeal of extension orders

(5) Every extension order made under subsection (1)

(*a*) remains in effect, subject to this section, for the period that is specified in the order, but the total of the specified period and the periods during which the goods were subject to related orders made under subsection (1) or 55(1) or section 60 or under subsection 5(3), (3.2)or (4.1) of the *Export and Import Permits Act* may not exceed eight years; and

(*b*) may, notwithstanding any other provision of this section, be amended or repealed at any time by the Governor in Council on the recommendation of the Minister, unless, before that time, a resolution directing that the order cease to have effect has been adopted by both Houses of Parliament under section 64.

Resolution of Parliament of cessation

PART 9

REPEAL AND COMING INTO FORCE

Repeal

Repeal of R.S., c. 41 (3rd Supp.)

213. The *Customs Tariff* is repealed.

Coming into Force

Coming into force

214. This Act comes into force or is deemed to have come into force on January 1, 1998 and applies, or is deemed to have applied, to all goods referred to in this Act imported on or after that day and to goods imported before that day that were not accounted for under section 32 of the *Customs Act* before that day.

GENERAL RULES FOR THE INTERPRETATION OF THE HARMONIZED SYSTEM

Classification of goods in the Nomenclature shall be governed by the following principles:

1. The titles of Sections, Chapters and sub-Chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions.

2. (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), presented unassembled or disassembled.

   (b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.

3. When by application of Rule 2 (b) or for any other reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:

   (a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.

   (b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to Rule 3 (a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.

   (c) When goods cannot be classified by reference to Rule 3 (a) or 3 (b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.

4. Goods which cannot be classified in accordance with the above Rules shall be classified under the heading appropriate to the goods to which they are most akin.

5. In addition to the foregoing provisions, the following Rules shall apply in respect of the goods referred to therein:

   (a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This Rule does not, however, apply to containers which give the whole its essential character.

   (b) Subject to the provisions of Rule 5 (a) above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.

6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related Subheading Notes and, *mutatis mutandis*, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purpose of this Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.

CANADIAN RULES

1. For legal purposes, the classification of goods in the tariff items of a subheading or of a heading shall be determined according to the terms of those tariff items and any related Supplementary Notes and, *mutatis mutandis*, to the General Rules for the Interpretation of the Harmonized System, on the understanding that only tariff items at the same level are comparable. For the purpose of this Rule the relative Section, Chapter and Subheading Notes also apply, unless the context otherwise requires.

2. Where both a Canadian term and an international term are presented in this Nomenclature, the commonly accepted meaning and scope of the international term shall take precedence.

3. For the purpose of Rule 5 (b) of the General Rules for the Interpretation of the Harmonized System, packing materials or packing containers clearly suitable for repetitive use shall be classified under their respective headings.

Chapter 4

DAIRY PRODUCE; BIRDS' EGGS; NATURAL HONEY; EDIBLE PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED

Notes.

1. The expression "milk" means full cream milk or partially or completely skimmed milk.

2. For the purposes of heading No. 04.05:

   (a) The term "butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80% or more but not more than 95% by weight, a maximum milk solids-not-fat content of 2% by weight and a maximum water content of 16% by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria.

   (b) The expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39% or more but less than 80% by weight.

3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading No. 04.06 provided that they have the three following characteristics:

   (a) a milkfat content, by weight of the dry matter, of 5% or more;

   (b) a dry matter content, by weight, of at least 70% but not exceeding 85%; and

   (c) they are moulded or capable of being moulded.

4. This Chapter does not cover:

   (a) Products obtained from whey, containing by weight more than 95% lactose, expressed as anhydrous lactose calculated on the dry matter (heading No. 17.02); or

   (b) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80% whey proteins, calculated on the dry matter) (heading No. 35.02) or globulins (heading No. 35.04).

Subheading Notes.

1. For the purposes of subheading No. 0404.10, the expression "modified whey" means products consisting of whey constituents, i.e., whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.

2. For the purposes of subheading No. 0405.10 the term "butter" does not include dehydrated butter or ghee (subheading No. 0405.90).

Supplementary Notes.

   (b) To improve or maintain their appearance (e.g., by the addition of vegetable oil or small quantities of glucose syrup), provided that they retain the character of dried fruit or dried nuts.

Supplementary Notes

   Otherwise, they fall in heading No. 23.02. However, germ of cereals, whole, rolled, flaked or ground is always classified in heading No. 11.04.

   (B) Products falling in this Chapter under the above provisions shall be classified in heading No. 11.01 or 11.02 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in Column (4) or (5) is not less, by weight, than that shown against the cereal concerned.

   Otherwise, they fall in heading No. 11.03 or 11.04.

Cereal (1)	Starch content (2)	Ash content (3)	Rate of passage through a sieve with an aperture of

   (b) in the case of other cereal products, at least 95% by weight passes through a woven metal wire cloth sieve with an aperture of 1.25 mm.

Supplementary Note .

1. For goods classified under tariff item No. 1108.11.10, 1108.11.20, 1108.19.11, 1108.19.12 or 1108.19.90, when in packages of a weight not exceeding 1 kg each, the weight of the packaging shall be included in the weight of the goods for the purpose of calculating the customs duties on the goods.

Section IV

PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

Note.

1. In this Section the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight.

Chapter 16

PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

Notes.

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapters 2 or 3 or heading No. 05.04.

2. Food preparations fall in this Chapter provided that they contain more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading No. 19.02 or to the preparations of heading No. 21.03 or 21.04.

Subheading Notes.

1. For the purpose of subheading No. 1602.10, the expression "homogenised preparations" means preparations of meat, meat offal or blood, finely homogenised, put up for retail sale as infant food or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading No. 16.02.

2. The fish and crustaceans specified in the subheadings of heading No. 16.04 or 16.05 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

Supplementary Note.

1. "Specially defined mixtures" of tariff items Nos. 1602.31.11, 1602.31.92, 1602.32.11 and 1602.32.92 means chicken or turkey or a product containing chicken or turkey, wherein 13% or more of the total weight of the product is comprised of goods other than the following: chicken, turkey, bread or breading, batter, oil, glazing, other coatings and bastes, and any added water (including that used in marination, glazing, other coatings, bastes, breading and batter). For the purposes of this definition, the weight of all ingredients shall be taken from the product specification sheets for that product required under the *Meat Inspection Act* for product labelling purposes.

MINERAL PRODUCTS

Chapter 25

SALT; SULPHUR; EARTHS AND STONE; PLASTERING MATERIALS, LIME AND CEMENT

Notes.

1. Except where their context or Note 4 to this Chapter otherwise requires, the headings of this Chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallisation), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading.

   The products of this Chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.

2. This Chapter does not cover:

   (a) Sublimed sulphur, precipitated sulphur or colloidal sulphur (heading No. 28.02);

   (b) Earth colours containing 70% or more by weight of combined iron evaluated as Fe_2O_3 (heading No. 28.21);

   (c) Medicaments or other products of Chapter 30;

   (d) Perfumery, cosmetic or toilet preparations (Chapter 33);

   (e) Setts, curbstones or flagstones (heading No. 68.01); mosaic cubes or the like (heading No. 68.02); roofing, facing or damp course slates (heading No. 68.03);

   (f) Precious or semi-precious stones (heading No. 71.02 or 71.03);

   (g) Cultured crystals (other than optical elements) weighing not less than 2.5 g each, of sodium chloride or of magnesium oxide, of heading No. 38.24; optical elements of sodium chloride or of magnesium oxide (heading No. 90.01);

   (h) Billiard chalks (heading No. 95.04); or

   (ij) Writing or drawing chalks or tailors' chalks (heading No. 96.09).

3. Any products classifiable in heading No. 25.17 and any other heading of the Chapter are to be classified in heading No. 25.17.

4. Heading No. 25.30 applies, *inter alia*, to: vermiculite, perlite and chlorites, unexpanded; earth colours, whether or not calcined or mixed together; natural micaceous iron oxides; meerschaum (whether or not in polished pieces); amber; agglomerated meerschaum and agglomerated amber, in plates, rods, sticks or similar forms, not worked after moulding; jet; strontianite (whether or not calcined), other than strontium oxide; broken pottery.

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of classification Nos. 2501.00.90.10, 2501.00.90.90 and 2507.00.00.00, the Unit of Measure (tonne or kilogram) refers to the weight of the salt or clay excluding the water in which it may be dispersed.

Chapter 26

ORES, SLAG AND ASH

Notes.

1. This Chapter does not cover:

   (a) Slag or similar industrial waste prepared as macadam (heading No. 25.17);

   (b) Natural magnesium carbonate (magnesite), whether or not calcined (heading No. 25.19);

   (c) Basic slag of Chapter 31;

   (d) Slag wool, rock wool or similar mineral wools (heading No. 68.06);

   (e) Waste or scrap of precious metal or of metal clad with precious metal; other waste or scrap containing precious metal or precious metal compounds, of a kind used principally for the recovery of precious metal (heading No. 71.12); or

   (f) Copper, nickel or cobalt mattes produced by any process of smelting (Section XV).

2. For the purpose of heading Nos. 26.01 to 26.17, the term "ores" means minerals of mineralogical species actually used in the metallurgical industry for the extraction of mercury, of the metals of heading No. 28.44 or of the metals of Section XIV or XV, even if they are intended for non-metallurgical purposes. Heading Nos. 26.01 to 26.17 do not, however, include minerals which have been submitted to processes not normal to the metallurgical industry.

3. Heading No. 26.20 applies only to ash and residues of a kind used in industry either for the extraction of metals or as a basis for the manufacture of chemical compounds of metals.

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of heading Nos. 26.02 to 26.17, with the exception of classification Nos. 2606.00.00.11, 2606.00.00.19, 2606.00.00.91, 2606.00.00.99, 2610.00.00.10 and 2615.10.00.10, the Unit of Measure (gram or kilogram) refers to the metal content of the ore or concentrate.

Chapter 27

MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES

Notes.

1. This Chapter does not cover:

   (a) Separate chemically defined organic compounds, other than pure methane and propane which are to be classified in heading No. 27.11;

   (b) Medicaments of heading No. 30.03 or 30.04; or

   (c) Mixed unsaturated hydrocarbons of heading No. 33.01, 33.02 or 38.05.

2. References in heading No. 27.10 to "petroleum oils and oils obtained from bituminous minerals" include not only petroleum oils and oils obtained from bituminous minerals but also similar oils, as well as those consisting mainly of mixed unsaturated hydrocarbons, obtained by any process, provided that the weight of the non-aromatic constituents exceeds that of the aromatic constituents.

   However, the references do not include liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (Chapter 39).

Subheading Notes.

1. For the purpose of subheading No. 2701.11, "anthracite" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14%.

2. For the purpose of subheading No. 2701.12, "bituminous coal" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14% and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5,833 kcal/kg.

3. For the purpose of subheading Nos. 2707.10, 2707.20, 2707.30, 2707.40 and 2707.60, the terms "benzole", "toluole", "xylole", "naphthalene" and "phenols" apply to products which contain more than 50% by weight of benzene, toluene, xylene, naphthalene or phenols, respectively.

Section VI

PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES

Notes.

1. (a) Goods (other than radioactive ores) answering to a description in heading No. 28.44 or 28.45 are to be classified in those headings and in no other heading of the Nomenclature.

   (b) Subject to paragraph (a) above, goods answering to a description in heading No. 28.43 or 28.46 are to be classified in those headings and in no other heading of this Section.

2. Subject to Note 1 above, goods classifiable in heading No. 30.04, 30.05, 30.06, 32.12, 33.03, 33.04, 33.05, 33.06, 33.07, 35.06, 37.07 or 38.08 by reason of being put up in measured doses or for retail sale are to be classified in those headings and in no other heading of the Nomenclature.

3. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:

   (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;

   (b) presented together; and

   (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

Chapter 28

INORGANIC CHEMICALS; ORGANIC OR INORGANIC COMPOUNDS OF PRECIOUS METALS, OF RARE-EARTH METALS, OF RADIOACTIVE ELEMENTS OR OF ISOTOPES

Notes.

1. Except where the context otherwise requires, the headings of this Chapter apply only to:

   (a) Separate chemical elements and separate chemically defined compounds, whether or not containing impurities;

   (b) The products mentioned in (a) above dissolved in water;

   (c) The products mentioned in (a) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;

   (d) The products mentioned in (a), (b) or (c) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;

   (e) The products mentioned in (a), (b), (c) or (d) above with an added anti-dusting agent or a colouring substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use.

2. In addition to dithionites and sulphoxylates, stabilised with organic substances (heading No. 28.31), carbonates and peroxocarbonates of inorganic bases (heading No. 28.36), cyanides, cyanide oxides and complex cyanides of inorganic bases (heading No. 28.37), fulminates, cyanates and thiocyanates, of inorganic bases (heading No. 28.38), organic products included in heading Nos. 28.43 to 28.46 and carbides (heading No. 28.49), only the following compounds of carbon are to be classified in this Chapter:

   (a) Oxides of carbon, hydrogen cyanide and fulminic, isocyanic, thiocyanic and other simple or complex cyanogen acids (heading No. 28.11);

   (b) Halide oxides of carbon (heading No. 28.12);

   (c) Carbon disulphide (heading No. 28.13);

   (d) Thiocarbonates, selenocarbonates, tellurocarbonates, selenocyanates, tellurocyanates, tetrathiocyanatodiamminochromates (reineckates) and other complex cyanates, of inorganic bases (heading No. 28.42);

   (e) Hydrogen peroxide, solidified with urea (heading No. 28.47), carbon oxysulphide, thiocarbonyl halides, cyanogen, cyanogen halides and cyanamide and its metal derivatives (heading No. 28.51) other than calcium cyanamide, whether or not pure (Chapter 31).

3. Subject to the provisions of Note 1 to Section VI, this Chapter does not cover:

   (a) Sodium chloride or magnesium oxide, whether or not pure, or other products of Section V;

   (b) Organo-inorganic compounds other than those mentioned in Note 2 above;

   (c) Products mentioned in Note 2, 3, 4 or 5 to Chapter 31;

   (d) Inorganic products of a kind used as luminophores, of heading No. 32.06;

   (e) Artificial graphite (heading No. 38.01); products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading No. 38.13; ink removers put up in packings for retail sale, of heading No. 38.24; cultured crystals (other than optical elements) weighing not less than 2.5 g each, of the halides of the alkali or alkaline-earth metals, of heading No. 38.24;

   (f) Precious or semi-precious stones (natural, synthetic or reconstructed) or dust or powder of such stones (heading Nos. 71.02 to 71.05), or precious metals or precious metal alloys of Chapter 71;

   (g) The metals, whether or not pure, metal alloys or cermets, including sintered metal carbides (metal carbides sintered with a metal), of Section XV; or

   (h) Optical elements, for example, of the halides of the alkali or alkaline-earth metals (heading No. 90.01).

4. Chemically defined complex acids consisting of a non-metal acid of sub-Chapter II and a metal acid of sub-Chapter IV are to be classified in heading No. 28.11.

5. Heading Nos. 28.26 to 28.42 apply only to metal or ammonium salts or peroxysalts.

   Except where the context otherwise requires, double or complex salts are to be classified in heading No. 28.42.

6. Heading No. 28.44 applies only to:

   (a) Technetium (atomic No. 43), promethium (atomic No. 61), polonium (atomic No. 84) and all elements with an atomic number greater than 84;

   (b) Natural or artificial radioactive isotopes (including those of the precious metals or of the base metals of Sections XIV and XV), whether or not mixed together;

   (c) Compounds, inorganic or organic, of these elements or isotopes, whether or not chemically defined, whether or not mixed together;

   (d) Alloys, dispersions (including cermets), ceramic products and mixtures containing these elements or isotopes or inorganic or organic compounds thereof and having a specific radioactivity exceeding 74 Bq/g (0.002 µ Ci/g);

   (e) Spent (irradiated) fuel elements (cartridges) of nuclear reactors;

   (f) Radioactive residues whether or not usable.

   The term "isotopes", for the purposes of this Note and of the wording of heading Nos. 28.44 and 28.45, refers to:

   - individual nuclides, excluding, however, those existing in nature in the monoisotopic state;

   - mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.

7. Heading No. 28.48 includes copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus.

8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this Chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in heading No. 38.18.

Supplementary Note.

1. For the purpose of tariff items of this Chapter, the following terms have the meanings hereby assigned to them:

   (a) "Glues or adhesives" goods described in heading No. 35.06;

   (b) "Optical fibres or optical fibre bundles or cables" goods described in subheading No. 9001.10;

Chapter 29

ORGANIC CHEMICALS

Notes.

1. Except where the context otherwise requires, the headings of this Chapter apply only to:

   (a) Separate chemically defined organic compounds, whether or not containing impurities;

   (b) Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);

   (c) The products of heading Nos. 29.36 to 29.39 or the sugar ethers and sugar esters, and their salts, of heading No. 29.40, or the products of heading No. 29.41, whether or not chemically defined;

   (d) The products mentioned in (a), (b) or (c) above dissolved in water;

   (e) The products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;

   (f) The products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;

   (g) The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use than for general use;

   (h) The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotisable amines and their salts.

2. This Chapter does not cover:

   (a) Goods of heading No. 15.04 or crude glycerol of heading No. 15.20;

   (b) Ethyl alcohol (heading No. 22.07 or 22.08);

   (c) Methane or propane (heading No. 27.11);

   (d) The compounds of carbon mentioned in Note 2 to Chapter 28;

   (e) Urea (heading No. 31.02 or 31.05);

   (f) Colouring matter of vegetable or animal origin (heading No. 32.03), synthetic organic colouring matter, synthetic organic products of a kind used as fluorescent brightening agents or as luminophores (heading No. 32.04) or dyes or other colouring matter put up in forms or packings for retail sale (heading No. 32.12);

   (g) Enzymes (heading No. 35.07);

   (h) Metaldehyde, hexamethylenetetramine or similar substances, put up in forms (for example, tablets, sticks or similar forms) for use as fuels, or liquid or liquefied-gas fuels in containers of a kind used for filling or refilling cigarette or similar lighters and of a capacity not exceeding 300 cm^3 (heading No. 36.06);

   (ij) Products put up as charges for fire-extinguishers or put up in fire-extinguishing grenades, of heading No. 38.13; ink removers put up in packings for retail sale, of heading No. 38.24; or

   (k) Optical elements, for example, of ethylenediamine tartrate (heading No. 90.01).

3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.

4. In heading Nos. 29.04 to 29.06, 29.08 to 29.11 and 29.13 to 29.20, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.

   Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purpose of heading No. 29.29.

   For the purpose of heading Nos. 29.11, 29.12, 29.14, 29.18 and 29.22, "oxygen-function" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in heading Nos. 29.05 to 29.20.

5. (a) The esters of acid-function organic compounds of sub-Chapters I to VII with organic compounds of these sub-Chapters are to be classified with that compound which is classified in the heading which occurs last in numerical order in these sub-Chapters.

   (b) Esters of ethyl alcohol with acid-function organic compounds of sub-Chapters I to VII are to be classified in the same heading as the corresponding acid-function compounds.

   (c) Subject to Note 1 to Section VI and Note 2 to Chapter 28:

      (1) Inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-Chapters I to X or heading No. 29.42, are to be classified in the heading appropriate to the organic compound; and

      (2) Salts formed between organic compounds of sub-Chapters I to X or heading No. 29.42 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter.

   (d) Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading No. 29.05).

   (e) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.

6. The compounds of heading Nos. 29.30 and 29.31 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic, mercury or lead) directly linked to carbon atoms.

   Heading No. 29.30 (organo-sulphur compounds) and heading No. 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).

7. Heading Nos. 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids or imides of polybasic acids.

   These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclising function or functions here listed.

Subheading Note.

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.

Supplementary Note.

1. For the purpose of tariff items of this Chapter, the following terms have the meanings hereby assigned to them:

   (a) "Glues or adhesives" goods described in heading No. 35.06;

   (b) "Optical fibres or optical fibre bundles or cables" goods described in subheading No. 9001.10;

   (c) "Typewriter or similar ribbons" goods described in subheading No. 9612.10;

   (d) "Polymers in primary forms or profile shapes or sheets of plastics" goods described in subheading Nos. 3901.10 to 3917.39 or in subheading Nos. 3918.10 to 3921.90.

Notes.

1. This Chapter does not cover:

   (a) Edible mixtures or preparations of animal or vegetable fats or oils of a kind used as mould release preparations (heading No. 15.17);

   (b) Separate chemically defined compounds; or

   (c) Shampoos, dentifrices, shaving creams and foams, or bath preparations, containing soap or other organic surface-active agents (heading No. 33.05, 33.06 or 33.07).

2. For the purpose of heading No. 34.01, the expression "soap" applies only to soap soluble in water. Soap and the other products of heading No. 34.01 may contain added substances (for example, disinfectants, abrasive powders, fillers or medicaments). Products containing abrasive powders remain classified in heading No. 34.01 only if in the form of bars, cakes or moulded pieces or shapes. In other forms they are to be classified in heading No. 34.05 as "scouring powders and similar preparations".

3. For the purpose of heading No. 34.02, "organic surface-active agents" are products which when mixed with water at a concentration of 0.5% at 20°C and left to stand for one hour at the same temperature:

   (a) give a transparent or translucent liquid or stable emulsion without separation of insoluble matter; and

   (b) reduce the surface tension of water to 4.5×10^{-2} N/m (45 dyne/cm) or less.

4. In heading No. 34.03 the expression "petroleum oils and oils obtained from bituminous minerals" applies to the products defined in Note 2 to Chapter 27.

5. In heading No. 34.04, subject to the exclusions provided below, the expression "artificial waxes and prepared waxes" applies only to:

   (A) Chemically produced organic products of a waxy character, whether or not water-soluble;

   (B) Products obtained by mixing different waxes;

   (C) Products of a waxy character with a basis of one or more waxes and containing fats, resins, mineral substances or other materials.

   The heading does not apply to:

   (a) Products of heading No. 15.16, 34.02 or 38.23, even if having a waxy character;

   (b) Unmixed animal waxes or unmixed vegetable waxes, whether or not refined or coloured, of heading No. 15.21;

   (c) Mineral waxes or similar products of heading No. 27.12, whether or not intermixed or merely coloured; or

   (d) Waxes mixed with, dispersed in or dissolved in a liquid medium (heading Nos. 34.05, 38.09, etc.).

Section VII

PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

Notes.

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:

   (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;

   (b) presented together; and

   (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.

2. Except for the goods of heading No. 39.18 or 39.19, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

Chapter 39

PLASTICS AND ARTICLES THEREOF

Notes.

1. Throughout the Nomenclature the expression “plastics” means those materials of heading Nos. 39.01 to 39.14 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

   Throughout the Nomenclature any reference to “plastics” also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

2. This Chapter does not cover:

   (a) Waxes of heading No. 27.12 or 34.04;

   (b) Separate chemically defined organic compounds (Chapter 29);

   (c) Heparin or its salts (heading No. 30.01);

   (d) Solutions (other than collodions) consisting of any of the products specified in heading Nos. 39.01 to 39.13 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (heading No. 32.08); stamping foils of heading No. 32.12;

   (e) Organic surface-active agents or preparations of heading No. 34.02;

   (f) Run gums or ester gums (heading No. 38.06);

   (g) Diagnostic or laboratory reagents on a backing of plastics (heading No. 38.22);

   (h) Synthetic rubber, as defined for the purpose of Chapter 40, or articles thereof;

   (ij) Saddlery or harness (heading No. 42.01) or trunks, suitcases, handbags or other containers of heading No. 42.02;

   (k) Plaits, wickerwork or other articles of Chapter 46;

   (l) Wall coverings of heading No. 48.14;

   (m) Goods of Section XI (textiles and textile articles);

   (n) Articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);

   (o) Imitation jewellery of heading No. 71.17;

   (p) Articles of Section XVI (machines and mechanical or electrical appliances);

   (q) Parts of aircraft or vehicles of Section XVII;

   (r) Articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);

   (s) Articles of Chapter 91 (for example, clock or watch cases);

   (t) Articles of Chapter 92 (for example, musical instruments or parts thereof);

   (u) Articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);

   (v) Articles of Chapter 95 (for example, toys, games, sports requisites); or

   (w) Articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouthpieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).

3. Heading Nos. 39.01 to 39.11 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:

   (a) Liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (heading Nos. 39.01 and 39.02);

   (b) Resins, not highly polymerised, of the coumarone-indene type (heading No. 39.11);

   (c) Other synthetic polymers with an average of at least 5 monomer units;

   (d) Silicones (heading No. 39.10);

   (e) Resols (heading No. 39.09) and other prepolymers.

4. The expression “copolymers” covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.

   For the purpose of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together.

   If no single comonomer unit predominates, copolymers, or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.

6. In heading Nos. 39.01 to 39.14, the expression “primary forms” applies only to the following forms:

   (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;

   (b) Blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

7. Heading No. 39.15 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (heading Nos. 39.01 to 39.14).

8. For the purpose of heading No. 39.17, the expression “tubes, pipes and hoses” means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.

9. For the purpose of heading No. 39.18, the expression “wall or ceiling coverings of plastics” applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.

10. In heading Nos. 39.20 and 39.21, the expression “plates, sheets, film, foil and strip” applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).

11. Heading No. 39.25 applies only to the following articles, not being products covered by any of the earlier headings of sub-Chapter II:

   (a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 litres;

   (b) Structural elements used, for example, in floors, walls or partitions, ceilings or roofs;

   (c) Gutters and fittings therefor;

   (d) Doors, windows and their frames and thresholds for doors;

   (e) Balconies, balustrades, fencing, gates and similar barriers;

   (f) Shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof;

   (g) Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;

(h) Ornamental architectural features, for example, flutings, cupolas, dovecotes; and

(ij) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

Subheading Note.

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:

(a) Where there is a subheading named “Other” in the same series:

(1) The designation in a subheading of a polymer by the prefix “poly” (e.g., polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content.

(2) The copolymers named in subheadings Nos. 3901.30, 3903.20, 3903.30 and 3904.30 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content.

(3) Chemically modified polymers are to be classified in the subheading named “Other”, provided that the chemically modified polymers are not more specifically covered by another subheading.

(4) Polymers not meeting (1), (2) or (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.

(b) Where there is no subheading named “Other” in the same series:

(1) Polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.

(2) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.

Supplementary Notes.

1. Notes 4 and 5 of this Chapter apply, *mutatis mutandis*, to all of the tariff items of this Chapter, other than those where the seventh and eighth digits are “00”.

2. (a) For the purpose of classification within any one subheading of this Chapter, the expression “composition” means only those polymers, copolymers, polymer blends and chemically modified polymers containing non-polymeric substances such as:

(i) initiators, activators and catalysts, to assist in the action or use of the polymeric substances in some intended process;

(ii) colourants; or

(iii) fillers, reinforcing agents, solvents, fire retardants, plasticizers and similar additives, present in amounts generally more than 1% by weight.

(b) The presence of any or combinations of the following, without the presence of other non-polymeric substances specified in paragraph (a) above, shall not render a material a composition:

(i) manufacturing impurities, 1% or less, by weight;

(ii) manufacturing impurities, more than 1% weight, provided the impurities do not contribute beneficially to the subsequent processing or performance of the polymeric material;

(iii) stabilizers such as antioxidants, process aids and similar special-purpose additives, present in small amounts, generally less than 1% weight;

(iv) anti-caking agents;

(v) water; or

(vi) in aqueous dispersions or solutions, the emulsifiers, stabilizers and other agents used to maintain the dispersion or solution form.

(c) For the purpose of classification within any subheading of this Chapter, “moulding compositions” includes partially formulated moulding compositions.

Statistical Notes. (NB These notes do not form part of the Customs Tariff legislation.)

1. Notes 4 and 5 of this Chapter apply, mutatis mutandis, to the classification numbers within any one tariff item of this Chapter.

2. Classification No. 3926.90.90.60 applies only to the following articles: nursing nipples and pacifiers; ice bags; douche bags; enema bags; hot water bottles and fittings therefor; invalid and similar nursing cushions; crutch tips or grips; dress shields; finger cots; pessaries; prophylactics; sanitary belts; bulbs for syringes; syringes (other than hypodermic syringes) and fittings therefor, not containing glass or metal.

Chapter 40

RUBBER AND ARTICLES THEREOF

Notes.

1. Except where the context otherwise requires, throughout the Nomenclature the expression "rubber" means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.

2. This Chapter does not cover:

   (a) Goods of Section XI (textiles and textile articles);

   (b) Footwear or parts thereof of Chapter 64;

   (c) Headgear or parts thereof (including bathing caps) of Chapter 65;

   (d) Mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;

   (e) Articles of Chapter 90, 92, 94 or 96; or

   (f) Articles of Chapter 95 (other than sports gloves and articles of heading Nos. 40.11 to 40.13).

3. In heading Nos. 40.01 to 40.03 and 40.05, the expression "primary forms" applies only to the following forms:

   (a) Liquids and pastes (including latex, whether or not pre-vulcanised, and other dispersions and solutions);

   (b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.

4. In Note 1 to this Chapter and in heading No. 40.02, the expression "synthetic rubber" applies to:

   (a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18°C and 29°C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purpose of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by Note 5 (b) (ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;

   (b) Thioplasts (TM); and

   (c) Natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanisation, elongation and recovery in (a) above.

5. (a) Heading Nos. 40.01 and 40.02 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:

      (i) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);

      (ii) pigments or other colouring matter, other than those added solely for the purpose of identification;

      (iii) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (b);

   (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading No. 40.01 or 40.02, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:

      (i) emulsifiers or anti-tack agents;

      (ii) small amounts of breakdown products of emulsifiers;

(iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.

6. For the purpose of heading No. 40.04, the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.

7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading No. 40.08.

8. Heading No. 40.10 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.

9. In heading Nos. 40.01, 40.02, 40.03, 40.05 and 40.08, the expressions "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

In heading No. 40.08 the expressions "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of classification Nos. 4010.11.10.10 to 4010.19.29.10, the term "light duty" refers to belts or belting having a tension rating not exceeding 26 KN/m. The term "heavy duty" refers to belts or belting having a tension rating exceeding 26 KN/m.

2. In this Chapter, the expression "densified wood" means wood which has been subjected to chemical or physical treatment (being, in the case of layers bonded together, treatment in excess of that needed to ensure a good bond), and which has thereby acquired increased density or hardness together with improved mechanical strength or resistance to chemical or electrical agencies.

3. Heading Nos. 44.14 to 44.21 apply to articles of the respective descriptions of particle board or similar board, fibreboard, laminated wood or densified wood as they apply to such articles of wood.

4. Products of heading No. 44.10, 44.11 or 44.12 may be worked to form the shapes provided for in respect of the goods of heading No. 44.09, curved, corrugated, perforated, cut or formed to shapes other than square or rectangular or submitted to any other operation provided it does not give them the character of articles of other headings.

5. Heading No. 44.17 does not apply to tools in which the blade, working edge, working surface or other working part is formed by any of the materials specified in Note 1 to Chapter 82.

6. Subject to Note 1 above and except where the context otherwise requires, any reference to "wood" in a heading of this Chapter applies also to bamboos and other materials of a woody nature.

Subheading Note.

1. For the purposes of subheadings Nos. 4403.41 to 4403.49, 4407.24 to 4407.29, 4408.31 to 4408.39 and 4412.13 to 4412.99, the expression "tropical wood" means one of the following types of wood:

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of classification Nos. 4401.21.00.00 and 4401.22.00.00, the unit of measure (tonne) refers to oven dry weight of wood in chips or particles.

   If oven dry weight is not given, convert the number of "units" shown into oven dry metric tonnes by using the following factors:

   (a) West Coast softwood units: multiply by 0.861
   (b) Other areas softwood units: multiply by 0.726
   (c) Hardwood units: multiply by 1.04
   OR
   (d) Bone dry weight units: multiply by 1.09
   (e) Wet weight units: multiply by 0.45

   The "unit" is the common quantity term used in the industry and is defined as 200 cubic feet of uncompacted pulpwood chips, wet or dry

Subject to the provisions of Note 6, heading Nos. 48.01 to 48.05 include paper and paperboard which have been subjected to calendering, super-calendering, glazing or similar finishing, false water-marking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibres, coloured or marbled throughout the mass by any method. Except where heading No. 48.03 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed.

3. In this Chapter the expression "newsprint" means uncoated paper of a kind used for the printing of newspapers, of which not less than 65% by weight of the total fibre content consists of wood fibres obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometres (microns), weighing not less than 40 g/m² and not more than 65 g/m².

4. In addition to hand-made paper and paperboard, heading No. 48.02 covers only paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical process and satisfying any of the following criteria:

   For paper or paperboard weighing not more than 150 g/m²:

1. a caliper of 225 micrometres (microns) or less, or

2. a caliper more than 225 micrometres (microns) but not more than 508 micrometres (microns) and an ash content more than 3%; or

(c) having a brightness of less than 60%, a caliper of 254 micrometres (microns) or less and an ash content more than 8%.

Heading No. 48.02 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.

5. In this Chapter "kraft paper and paperboard" means paper and paperboard of which not less than 80% by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes.

6. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of the headings Nos. 48.01 to 48.11 are to be classified under that one of such headings which occurs last in numerical order in the Nomenclature.

7. (A) Heading Nos. 48.01, 48.02, 48.04 to 48.08, 48.10 and 48.11 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres:

(a) in strips or rolls of a width exceeding 15 cm; or

(b) in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.

Except that hand-made paper and paperboard in any size or shape as made directly and having all its edges deckled remains classified, subject to the provisions of Note 6, in heading No. 48.02.

(B) Heading Nos. 48.03 and 48.09 apply only to paper, cellulose wadding and webs of cellulose fibres:

(a) in strips or rolls of a width exceeding 36 cm; or

(b) in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.

8. For the purpose of heading No. 48.14, the expression "wallpaper and similar wall coverings" applies only to:

(a) Paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration:

(i) Grained, embossed, surface-coloured, design-printed or otherwise surface-decorated (e.g., with textile flock), whether or not coated or covered with transparent protective plastics;

(ii) With an uneven surface resulting from the incorporation of particles of wood, straw, etc.;

(iii) Coated or covered on the face side with plastics, the layer of plastics being grained, embossed, coloured, design-printed or otherwise decorated; or

(iv) Covered on the face side with plaiting material, whether or not bound together in parallel strands or woven;

(b) Borders and friezes, of paper, treated as above, whether or not in rolls, suitable for wall or ceiling decoration;

(c) Wall coverings of paper made up of several panels, in rolls or sheets, printed so as to make up a scene, design or motif when applied to a wall.

Products on a base of paper or paperboard, suitable for use both as floor coverings and as wall coverings, are to be classified in heading No. 48.15.

9. Heading No. 48.20 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.

10. Heading No. 48.23 applies, *inter alia*, to perforated paper or paperboard cards for Jacquard or similar machines and paper lace.

11. Except for the goods of heading No. 48.14 or 48.21, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

3. For the purpose of subheading No. 4805.10, "semi-chemical fluting paper" means paper, in rolls, of which not less than 65% by weight of the total fibre content consists of unbleached hardwood fibres obtained by a semi-chemical pulping process, and having a CMT 60 (Concora Medium Test with 60 minutes of conditioning) crush resistance exceeding 196 newtons at 50% relative humidity, at 23°C.

4. For the purpose of subheading No. 4805.30 "sulphite wrapping paper" means machine-glazed paper, of which more than 40% by weight of the total fibre content consists of wood fibres obtained by the chemical sulphite process, having an ash content not exceeding 8% and having a Mullen burst index of not less than 1.47 kPa.m²/g.

5. For the purpose of subheading No. 4810.21, "light-weight coated paper" means paper, coated on both sides, of a total weight not exceeding 72 g/m², with a coating weight not exceeding 15 g/m² per side, on a base of which not less than 50% by weight of the total fibre content consists of wood fibres obtained by a mechanical process.

Supplementary Note.

1. For the purpose of this Chapter, the expression "not converted" means:

   (a) in the case of rolls of paper or paperboard, rolls which are the direct output of a paper-making machine and which have not been punched, perforated, scored, ruled, printed, folded, embossed, decorated or otherwise processed (excluding creped or crinkled); and

   (b) in the case of sheets of paper or paperboard, rectangular (including square) sheets with one side exceeding 43 cm and the other side exceeding 56 cm in the unfolded state and which have not been slit, punched, perforated, scored, ruled, printed, folded, embossed, decorated or otherwise processed.

Notes.

1. This Chapter does not cover:

   (a) Photographic negatives or positives on transparent bases (Chapter 37);

   (b) Maps, plans or globes, in relief, whether or not printed (heading No. 90.23);

   (c) Playing cards or other goods of Chapter 95; or

   (d) Original engravings, prints or lithographs (heading No. 97.02), postage or revenue stamps, stamp-postmarks, first-day covers, postal stationery or the like of heading No. 97.04, antiques of an age exceeding one hundred years or other articles of Chapter 97.

2. For the purpose of Chapter 49, the term "printed" also means reproduced by means of a duplicating machine, produced under the control of a computer, embossed, photographed, photocopied, thermocopied or typewritten.

3. Newspapers, journals and periodicals which are bound otherwise than in paper, and sets of newspapers, journals or periodicals comprising more than one number under a single cover are to be classified in heading No. 49.01, whether or not containing advertising material.

4. Heading No. 49.01 also covers:

   (a) A collection of printed reproductions of, for example, works of art or drawings, with a relative text, put up with numbered pages in a form suitable for binding into one or more volumes;

   (b) A pictorial supplement accompanying, and subsidiary to, a bound volume; and

   (c) Printed parts of books or booklets, in the form of assembled or separate sheets or signatures, constituting the whole or a part of a complete work and designed for binding.

   However, printed pictures or illustrations not bearing a text, whether in the form of signatures or separate sheets, fall in heading No. 49.11.

5. Subject to Note 3 to this Chapter, heading No. 49.01 does not cover publications which are essentially devoted to advertising (for example, brochures, pamphlets, leaflets, trade catalogues, year books published by trade associations, tourist propaganda). Such publications are to be classified in heading No. 49.11.

6. For the purpose of heading No. 49.03, the expression "children's picture books" means books for children in which the pictures form the principal interest and the text is subsidiary.

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of classification No. 4911.91.90.20, the description "Trading Cards" refers to collectors' cards such as "baseball cards", "hockey cards", "football cards" and the like.

2. (A) Goods classifiable in Chapters 50 to 55 or in heading No. 58.09 or 59.02 and of a mixture of two or more textile materials are to be classified as if consisting wholly of that one textile material which predominates by weight over any other single textile material.

   When no one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

(a) Gimped horsehair yarn (heading No. 51.10) and metallized yarn (heading No. 56.05) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;

(d) Cut to size and having undergone a proc ess of drawn thread work;

(e) Assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded);

(f) Knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.

8. For the purposes of Chapters 50 to 60:

   (a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of Note 7 above; and

   (b) Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.

9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.

10. Elastic products consisting of textile materials combined with rubber threads are classified in this Section.

11. For the purpose of this Section, the expression "impregnated" includes "dipped".

12. For the purpose of this Section, the expression "polyamides" includes "aramids".

Subheading Notes.

1. In this Section and, where applicable, throughout the Nomenclature, the following expressions have the meanings hereby assigned to them:

   (a) **Elastomeric yarn**

   Filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.

   (b) **Unbleached yarn**

   Yarn which:

   (i) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or

   (ii) is of indeterminate colour ("grey yarn"), manufactured from garnetted stock.

   Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustring agents (for example, titanium dioxide).

   (c) **Bleached yarn**

   Yarn which:

   (i) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;

   (ii) consists of a mixture of unbleached and bleached fibres; or

   (iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.

   (d) **Coloured (dyed or printed) yarn**

   Yarn which:

   (i) is dyed (whether or not in the mass) other than white or in a fugitive colour, or printed, or made from dyed or printed fibres;

   (ii) consists of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl or mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;

(iii) is obtained from slivers or rovings which have been printed; or

(iv) is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply, *mutatis mutandis*, to monofilament and to strip or the like of Chapter 54.

(e) **Unbleached woven fabric**

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

(f) **Bleached woven fabric**

Woven fabric which:

(i) has been bleached or, unless the context otherwise requir es, dyed white or treated with a white dressing, in the piece;

(ii) consists of bleached yarn; or

(iii) consists of unbleached and bleached yarn.

(g) **Dyed woven fabric**

Woven fabric which:

(i) is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or

(ii) consists of coloured yarn of a single uniform colour.

(h) **Woven fabric of yarns of different colours**

Woven fabric (other than printed woven fabric) which:

(i) consists of yarns of different colours or yarns of different shades of the same colour other than the natural colour of the constituent fibres);

(ii) consists of unbleached or bleached yarn and coloured yarn; or

(iii) consists of marl or mixture yarns.

(In all cases, the yarn used in selvedges and piece ends is not taken into consideration.)

(ij) **Printed woven fabric**

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerization does not affect the classification of yarns or fabrics within the above categories.

(k) **Plain weave**

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. (A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 consisting of the same textile materials.

(B) For the application of this rule:

(a) where appropriate, only the part which determines the classification under Interpretative Rule 3 shall be taken into account;

(b) in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;

(c) in the case of embroidery of heading No. 58.10 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

Supplementary Note.

Chapter 54

MAN-MADE FILAMENTS

Notes.

1. Throughout the Nomenclature, the term "man-made fibres" means staple fibres and filaments of organic polymers produced by manufacturing processes, either:

   (a) By polymerisation of organic monomers, such as polyamides, polyesters, polyurethanes or polyvinyl derivatives; or

   (b) By chemical transformation of natural organic polymers (for example, cellulose, casein, proteins or algae), such as viscose rayon, cellulose acetate, cupro or alginates.

   The terms "synthetic" and "artificial", used in relation to fibres, mean: synthetic: fibres as defined at (a); artificial: fibres as defined at (b).

   The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. Heading Nos. 54.02 and 54.03 do not apply to synthetic or artificial filament tow of Chapter 55.

Chapter 55

MAN-MADE STAPLE FIBRES

Note.

1. Heading Nos. 55.01 and 55.02 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:

   (a) Length of tow exceeding 2 m;

   (b) Twist less than 5 turns per metre;

   (c) Measuring per filament less than 67 decitex;

   (d) Synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100% of its length;

   (e) Total measurement of tow more than 20,000 decitex.

   Tow of a length not exceeding 2 m is to be classified in heading No. 55.03 or 55.04.

Chapter 56

WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

Notes.

1. This Chapter does not cover:

   (a) Wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading No. 34.01, polishes, creams or similar preparations of heading No. 34.05, fabric softeners of heading No. 38.09) where the textile material is present merely as a carrying medium;

   (b) Textile products of heading No. 58.11;

   (c) Natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading No. 68.05);

   (d) Agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading No. 68.14); or

   (e) Metal foil on a backing of felt or nonwovens (Section XV).

2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.

3. Heading Nos. 56.02 and 56.03 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

   Heading No. 56.03 also includes nonwovens in which plastics or rubber forms the bonding substance.

   Heading Nos. 56.02 and 56.03 do not, however, cover:

   (a) Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50% or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);

   (b) Nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or

   (c) Plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).

4. Heading No. 56.04 does not cover textile yarn, or strip or the like of heading No. 54.04 or 54.05, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

SPECIAL WOVEN FABRICS; TUFTED TEXTILE FABRICS; LACE; TAPESTRIES; TRIMMINGS; EMBROIDERY

Notes.

1. This Chapter does not apply to textile fabrics referred to in Note 1 to Chapter 59, impregnated, coated, covered or laminated, or to other goods of Chapter 59.

2. Heading No. 58.01 also includes woven weft pile fabrics which have not yet had the floats cut, at which stage they have no pile standing up.

3. For the purpose of heading No. 58.03, "gauze" means a fabric with a warp composed wholly or in part of standing or ground threads and crossing or doup threads which cross the standing or ground threads making a half turn, a complete turn or more to form loops through which weft threads pass.

4. Heading No. 58.04 does not apply to knotted net fabrics of twine, cordage or rope, of heading No. 56.08.

5. For the purpose of heading No. 58.06, the expression "narrow woven fabrics" means:

   (a) Woven fabrics of a width not exceeding 30 cm, whether woven as such or cut from wider pieces, provided with selvedges (woven, gummed or otherwise made) on both edges;

   (b) Tubular woven fabrics of a flattened width not exceeding 30 cm, and

   (c) Bias binding with folded edges, of a width when unfolded not exceeding 30 cm.

   Narrow woven fabrics with woven fringes are to be classified in heading No. 58.08.

6. In heading No. 58.10, the expression "embroidery" means, *inter alia*, embroidery with metal or glass thread on a visible ground of textile fabric, and sewn appliqué work of sequins, beads or ornamental motifs of textile or other materials. The heading does not apply to needlework tapestry (heading No. 58.05).

7. In addition to the products of heading No. 58.09, this Chapter also includes articles made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.

Chapter 59

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

Notes.

1. Except where the context otherwise requires, for the purpose of this Chapter the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and heading Nos. 58.03 and 58.06, the braids and ornamental trimmings in the piece of heading No. 58.08 and the knitted or crocheted fabrics of heading No. 60.02.

2. Heading No. 59.03 applies to:

   (a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than:

      (1) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;

      (2) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually Chapter 39);

      (3) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);

      (4) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);

      (5) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or

      (6) Textile products of heading No. 58.11;

   (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading No. 56.04.

3. For the purpose of heading No. 59.05, the expression "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

   This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading No. 48.14) or on a textile backing (generally heading No. 59.07).

4. For the purpose of heading No. 59.06, the expression "rubberised textile fabrics" means:

   (a) Textile fabrics impregnated, coated, covered or laminated with rubber,

      (i) Weighing not more than 1,500 g/m²; or

      (ii) Weighing more than 1,500 g/m² and containing more than 50% by weight of textile material;

   (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading No. 56.04;

   (c) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre.

   This heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or textile products of heading No. 58.11.

5. Heading No. 59.07 does not apply to:

   (a) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;

   (b) Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);

(c) Fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments; however, imitation pile fabrics remain classified in this heading;

(d) Fabrics finished with normal dressings having a basis of amylaceous or similar substances;

(e) Wood veneered on a backing of textile fabrics (heading No. 44.08);

(f) Natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading No. 68.05);

(g) Agglomerated or reconstituted mica, on a backing of textile fabrics (heading No. 68.14); or

(h) Metal foil on a backing of textile fabrics (Section XV).

6. Heading No. 59.10 does not apply to:

(a) Transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or

(b) Transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading No. 40.10).

7. Heading No. 59.11 applies to the following goods, which do not fall in any other heading of Section XI:

(a) Textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of heading Nos. 59.08 to 59.10), the following only:

(i) Textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);

(ii) Bolting cloth;

(iii) Straining cloth of a kind used in oil presses or the like, of textile material or of human hair;

(iv) Flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;

(v) Textile fabrics reinforced with metal, of a kind used for technical purposes;

(vi) Cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;

(b) Textile articles (other than those of heading Nos. 59.08 to 59.10) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in paper-making or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

Chapter 61

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

Notes.

1. This Chapter applies only to made up knitted or crocheted articles.

2. This Chapter does not cover:

   (a) Goods of heading No. 62.12;

   (b) Worn clothing or other worn articles of heading No. 63.09; or

   (c) Orthopaedic appliances, surgical belts, trusses or the like (heading No. 90.21).

3. For the purpose of heading Nos. 61.03 and 61.04:

   (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

   - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and

   - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

   If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

   The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

   - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

   - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

   - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

   (b) The term "ensemble" means a set of garments (other than suits and articles of heading No. 61.07, 61.08 or 61.09), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

   - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and

   - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

   All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading No. 61.12.

4. Heading Nos. 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading No. 61.05 does not cover sleeveless garments.

5. Heading No. 61.09 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.

6. For the purpose of heading No. 61.11:

   (a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;

   (b) Articles which are, *prima facie*, classifiable both in heading No. 61.11 and in other headings of this Chapter are to be classified in heading No. 61.11.

7. For the purpose of heading No. 61.12, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

   (a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

   (b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

   - one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

   - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

   The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

   All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

8. Garments which are, *prima facie*, classifiable both in heading No. 61.13 and in other headings of this Chapter, excluding heading No. 61.11, are to be classified in heading No. 61.13.

9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

   Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this Chapter may be made of metal thread.

   - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and

   - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

   If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

   The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

   - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

   - evening dress (tailcoat), generally made of black cloth, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

   - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

   (b) The term "ensemble" means a set of garments (other than suits and articles of heading No. 62.07 or 62.08) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

   - one garment designed to cover the upper part of the body with the exception of waistcoats which may also form a second upper garment, and

   - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

   All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading No. 62.11.

4. For the purpose of heading No. 62.09:

   (a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm; it also covers babies' napkins;

   (b) Articles which are, *prima facie*, classifiable both in heading No. 62.09 and in other headings of this Chapter are to be classified in heading No. 62.09.

5. Garments which are, *prima facie*, classifiable both in heading No. 62.10 and in other headings of this Chapter, excluding heading No. 62.09, are to be classified in heading No. 62.10.

6. For the purpose of heading No. 62.11, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

   (a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

   (b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

   - one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

   - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

   The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

   All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (heading No. 62.13). Handkerchiefs of which any side exceeds 60 cm are to be classified in heading No. 62.14.

8. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

   Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this Chapter may be made of metal thread.

Chapter 70

GLASS AND GLASSWARE

Notes.

1. This Chapter does not cover:

   (a) Goods of heading No. 32.07 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);

   (b) Articles of Chapter 71 (for example, imitation jewellery);

   (c) Optical fibre cables of heading No. 85.44, electrical insulators (heading No. 85.46) or fittings of insulating material of heading No. 85.47;

   (d) Optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of Chapter 90;

   (e) Lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading No. 94.05;

   (f) Toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or

   (g) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.

2. For the purpose of heading Nos. 70.03, 70.04 and 70.05:

   (a) glass is not regarded as "worked" by reason of any process it has undergone before annealing;

   (b) cutting to shape does not affect the classification of glass in sheets;

   (c) the expression "absorbent or reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.

3. The products referred to in heading No. 70.06 remain classified in that heading whether or not they have the character of articles.

4. For the purpose of heading No. 70.19, the expression "glass wool" means:

   (a) Mineral wools with a silica (SiO_2) content not less than 60% by weight;

   (b) Mineral wools with a silica (SiO_2) content less than 60% but with an alkaline oxide (K_2O or Na_2O) content exceeding 5% by weight or a boric oxide (B_2O_3) content exceeding 2% by weight.

   Mineral wools which do not comply with the above specifications fall in heading No. 68.06.

5. Throughout the Nomenclature, the expression "glass" includes fused quartz and other fused silica.

Subheading Note.

1. For the purpose of subheading Nos. 7013.21, 7013.31 and 7013.91, the expression "lead crystal" means only glass having a minimum lead monoxide (PbO) content by weight of 24%.

Chapter 71

NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMI-PRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELLERY; COIN

Notes.

1. Subject to Note 1 (a) to Section VI and except as provided below, all articles consisting wholly or partly:

   (a) Of natural or cultured pearls or of precious or semi-precious stones (natural, synthetic or reconstructed), or

   (b) Of precious metal or of metal clad with precious metal, are to be classified in this Chapter.

2. (a) Heading Nos. 71.13, 71.14 and 71.15 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph (b) of the foregoing Note does not apply to such articles.

   (b) Heading No. 71.16 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents).

3. This Chapter does not cover:

   (a) Amalgams of precious metal, or colloidal precious metal (heading No. 28.43);

   (b) Sterile surgical suture materials, dental fillings or other goods of Chapter 30;

   (c) Goods of Chapter 32 (for example, lustres);

   (d) Supported catalysts (heading No. 38.15);

   (e) Articles of heading No. 42.02 or 42.03 referred to in Note 2 (B) to Chapter 42;

   (f) Articles of heading No. 43.03 or 43.04;

   (g) Goods of Section XI (textiles and textile articles);

   (h) Footwear, headgear or other articles of Chapter 64 or 65;

   (ij) Umbrellas, walking-sticks or other articles of Chapter 66;

   (k) Abrasive goods of heading No. 68.04 or 68.05 or Chapter 82, containing dust or powder of precious or semi-precious stones (natural or synthetic); articles of Chapter 82 with a working part of precious or semi-precious stones (natural, synthetic or reconstructed); machinery, mechanical appliances or electrical goods, or parts thereof, of Section XVI. However, articles and parts thereof, wholly of precious or semi-precious stones (natural, synthetic or reconstructed) remain classified in this Chapter, except unmounted worked sapphires and diamonds for styli (heading No. 85.22);

   (l) Articles of Chapter 90, 91 or 92 (scientific instruments, clocks and watches, musical instruments);

   (m) Arms or parts thereof (Chapter 93);

   (n) Articles covered by Note 2 to Chapter 95;

   (o) Articles classified in Chapter 96 by virtue of Note 4 to that Chapter; or

   (p) Original sculptures or statuary (heading No. 97.03), collectors' pieces (heading No. 97.05) or antiques of an age exceeding one hundred years (heading No. 97.06), other than natural or cultured pearls or precious or semi-precious stones.

4. (a) The expression "precious metal" means silver, gold and platinum.

   (b) The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.

   (c) The expression "precious or semi-precious stones" does not include any of the substances specified in Note 2 (b) to Chapter 96.

5. For the purpose of this Chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2%, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:

   (a) An alloy containing 2% or more, by weight, of platinum is to be treated as an alloy of platinum;

   (b) An alloy containing 2% or more, by weight, of gold but no platinum, or less than 2%, by weight, of platinum, is to be treated as an alloy of gold;

   (c) Other alloys containing 2% or more, by weight, of silver are to be treated as alloys of silver.

6. Except where the context otherwise requires, any reference in the Nomenclature to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in Note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.

7. Throughout the Nomenclature the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.

8. Subject to Note 1 (a) to Section VI, goods answering to a description in heading No. 71.12 are to be classified in that heading and in no other heading of the Nomenclature.

9. For the purpose of heading No. 71.13, the expression "articles of jewellery" means:

   (a) Any small objects of personal adornment (gem-set or not) (for example, rings, bracelets, necklaces, brooches, ear-rings, watch-chains, fobs, pendants, tie-pins, cuff-links, dress-studs, religious or other medals and insignia); and

   (b) Articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (such as cigarette cases, powder boxes, chain purses, cachou boxes).

10. For the purpose of heading No. 71.14, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' requisites and other articles of household, office or religious use.

11. For the purpose of heading No. 71.17, the expression "imitation jewellery" means articles of jewellery within the meaning of paragraph (a) of Note 9 above (but not including buttons or other articles of heading No. 96.06, or dress-combs, hair-slides or the like, or hairpins, of heading No. 96.15), not incorporating natural or cultured pearls, precious or semi-precious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

Subheading Notes.

1. For the purpose of subheading Nos. 7106.10, 7108.11, 7110.11, 7110.21, 7110.31 and 7110.41, the expressions "powder" and "in powder form" mean products of which 90% or more by weight passes through a sieve having a mesh aperture of 0.5 mm.

2. Notwithstanding the provisions of Chapter Note 4 (b), for the purpose of subheading Nos. 7110.11 and 7110.19, the expression "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium.

3. For the classification of alloys in the subheading of heading No. 71.10, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium which predominates by weight over each other of these metals.

   (n) Articles of Chapter 97 (for example, works of art).

2. Throughout the Nomenclature, the expression "parts of general use" means:

   (a) Articles of heading No. 73.07, 73.12, 73.15, 73.17 or 73.18 and similar articles of other base metal;

   (b) Springs and leaves for springs, of base metal, other than clock or watch springs (heading No. 91.14); and

   (c) Articles of heading Nos. 83.01, 83.02, 83.08, 83.10 and frames and mirrors, of base metal, of heading No. 83.06.

   In Chapters 73 to 76 and 78 to 82 (but not in heading No. 73.15) references to parts of goods do not include references to parts of general use as defined above.

   Subject to the preceding paragraph and to Note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.

3. Throughout the Nomenclature, the expression "base metals" means: iron and steel, copper, nickel, aluminum, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

4. Throughout the Nomenclature, the term "cermets" means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term "cermets" includes sintered metal carbides (metal carbides sintered with a metal).

5. Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74):

   (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals;

   (b) An alloy composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals equals or exceeds the total weight of the other elements present;

   (c) In this Section the term "alloys" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.

6. Unless the context otherwise requires, any reference in the Nomenclature to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles:

   Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the Interpretative Rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals. For this purpose:

   (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;

   (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5, it is classified; and

   (c) A cermet of heading No. 81.13 is regarded as a single base metal.

8. In this Section, the following expressions have the meanings hereby assigned to them:

   (a) **Waste and scrap**

   Metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

   (b) **Powders**

   Products of which 90% or more by weight passes through a sieve having a mesh aperture of 1 mm.

Supplementary Note.

1. Unless the context otherwise requires, the expression "diameter", when applied to tubes and pipes, refers to the actual internal diameter.

Chapter 72

   (c) **Ferro-alloys**

   Alloys in pigs, blocks, lumps or similar primary forms, in forms obtained by continuous casting and also in granular or powder forms, whether or not agglomerated, commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurizing agents or for similar uses in ferrous metallurgy and generally not usefully malleable, containing by weight 4% or more of the element iron and one or more of the following:

   - more than 10% of chromium
   - more than 30% of manganese
   - more than 3% of phosphorus
   - more than 8% of silicon
   - a total of more than 10% of other elements, excluding carbon, subject to a maximum content of 10% in the case of copper.

   (d) **Steel**

   Ferrous materials other than those of heading No. 72.03 which (with the exception of certain types produced in the form of castings) are usefully malleable and which contain by weight 2% or less of carbon. However, chromium steels may contain higher proportions of carbon.

   (e) **Stainless steel**

- 0.1% or more of other elements (except sulphur, phosphorus, carbon and nitrogen), taken separately.

(g) **Remelting scrap ingots of iron or steel**

Products roughly cast in the form of ingots without feeder-heads or hot tops, or of pigs, having obvious surface faults and not complying with the chemical composition of pig iron, spiegeleisen or ferro-alloys.

(h) **Granules**

Products of which less than 90% by weight passes through a sieve with a mesh aperture of 1 mm and of which 90% or more by weight passes through a sieve with a mesh aperture of 5 mm.

(ij) **Semi-finished products**

Continuous cast products of solid section, whether or not subjected to primary hot-rolling; and

Other products of solid section, which have not been further worked than subjected to primary hot-rolling or roughly shaped by forging, including blanks for angles, shapes or sections.

These products are not presented in coils.

(k) **Flat-rolled products**

Rolled products of solid rectangular (other than square) cross-section, which do not conform to the definition at (ij) above in the form of:

- coils of successively superimposed layers, or
- straight lengths, which if of a thickness less than 4.75 mm are of a width measuring at least ten times the thickness or if of a thickness of 4.75 mm or more are of a width which exceeds 150 mm and measures at least twice the thickness.

Flat-rolled products include those with patterns in relief derived directly from rolling (for example, grooves, ribs, chequers, tears, buttons, lozenges) and those which have been perforated, corrugated or polished, provided that they do not thereby assume the character of articles or products of other headings.

Flat-rolled products of a shape other than rectangular or square, of any size, are to be classified as products of a width of 600 mm or more, provided that they do not assume the character of articles or products of other headings.

(l) **Bars and rods, hot-rolled, in irregularly wound coils**

Hot-rolled products in irregularly wound coils, which have a solid cross-section in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(m) **Other bars and rods**

Products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may:

- have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods);
- be twisted after rolling.

(n) **Angles, shapes and sections**

Products having a uniform solid cross-section along their whole length which do not conform to any of the definitions at (ij), (k), (l) or (m) above or to the definition of wire.

Chapter 72 does not include products of heading No. 73.01 or 73.02.

(o) **Wire**

Cold-formed products in coils, of any uniform solid cross-section along their whole length, which do not conform to the definition of flat-rolled products.

(p) **Hollow drill bars and rods**

Hollow bars and rods of any cross-section, suitable for drills, of which the greatest external dimension of the cross-section exceeds 15 mm but does not exceed 52 mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified in heading No. 73.04.

2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.

3. Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified, according to their form, their composition and their appearance, in the headings of this Chapter appropriate to similar hot-rolled products.

Subheading Notes.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Alloy pig iron**

(d) **High speed steel**

Alloy steels containing, with or without other elements, at least two of the three elements molybdenum, tungsten and vanadium with a combined content by weight of 7% or more, 0.6% or more of carbon and 3 to 6% of chromium.

(e) **Silico-manganese steel**

- not more than 0.7% of carbon,
- 0.5% or more but not more than 1.9% of manganese, and
- 0.6% or more but not more than 2.3% of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the subheadings of heading No. 72.02 the following rule should be observed:

A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1 (c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" referred to in Chapter Note 1 (c) must each exceed 10% by weight.

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

For the purpose of subheading Nos. 7222.11, 7222.19, 7222.20 and 7222.30, the expression "high nickel alloy steel" is considered to be nickel alloy steel containing by weight 3% or more of nickel.

Chapter 73

ARTICLES OF IRON OR STEEL

Notes

1. In this Chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1 (d) to Chapter 72.

2. In this Chapter the word "wire" means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

Chapter 74

COPPER AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Refined copper**

Metal containing at least 99.85% by weight of copper; or

Metal containing at least 97.5% by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE -- Other elements

Element	Limiting content % by weight
Ag Silver	0.25
As Arsenic	0.5
Cd Cadmium	1.3
Cr Chromium	1.4
Mg Magnesium	0.8
Pb Lead	1.5
S Sulphur	0.7
Sn Tin	0.8
Te Tellurium	0.8
Zn Zinc	1
Zr Zirconium	0.3
Other elements*, each	0.3

* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) **Copper alloys**

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(i) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or

(ii) the total content by weight of such other elements exceeds 2.5%.

(c) **Master alloys**

Alloys containing with other elements more than 10% by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus falls in heading No. 28.48.

(d) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading No. 74.03.

(e) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

In the case of heading No. 74.14, however, the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

(g) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading No. 74.03), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading Nos. 74.09 and 74.10 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(h) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Copper-zinc base alloys (brasses)**

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by weight over each of such other elements;
- any nickel content by weight is less than 5% (see copper-nickel-zinc alloys (nickel silvers)); and
- any tin content by weight is less than 3% (see copper-tin alloys (bronzes)).

(b) **Copper-tin base alloys (bronzes)**

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3% or more the zinc content by weight may exceed that of tin but must be less than 10%.

(c) **Copper-nickel-zinc base alloys (nickel silvers)**

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5% or more by weight (see copper-zinc alloys (brasses)).

(d) **Copper-nickel base alloys**

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1% of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

Supplementary Note.

1. In this Chapter the expression "unworked", when referring to bars, rods and profiles, means products which have not been subsequently worked after production (for example, not machined, drilled, punched, twisted or crimped).

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of subheading No. 7401.10, the unit of measure (kilogram) refers to the copper content of the matte and shall be the assay quantity without deductions.

Chapter 75

NICKEL AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading No. 75.02), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading No. 75.06 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Notes.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

   (a) **Nickel, not alloyed**

   Metal containing by weight at least 99% of nickel plus cobalt, provided that:

   (i) the cobalt content by weight does not exceed 1.5%, and

   (ii) the content by weight of any other element does not exceed the limit specified in the following table:

   TABLE - Other elements

Element	Limiting content % by weight
Fe Iron	0.5
O Oxygen	0.4
Other elements, each	0.3

   (b) **Nickel alloys**

   Metallic substances in which nickel predominates by weight over each of the other elements provided that:

   (i) the content by weight of cobalt exceeds 1.5%,

   (ii) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or

   (iii) the total content by weight of elements other than nickel plus cobalt exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 1 (c), for the purposes of subheading No. 7508.10 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

Supplementary Note.

1. In this Chapter the expression "unworked", when referring to foil, means products which have not been processed beyond the condition as from the rolling mill (for example, not machined, cut to shape, perforated or coated).

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the purpose of subheading No. 7501.10, the unit of measure (kilogram) refers to the nickel content of the matte and shall be the assay quantity without deductions.

Chapter 76

ALUMINUM AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles", and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading No. 76.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading Nos. 76.06 and 76.07 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Notes.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

   (a) **Aluminum, not alloyed**

   Metal containing by weight at least 99% of aluminum, provided that the content by weight of any other element does not exceed the limit specified in the following table:

   TABLE -- Other elements

Element	Limiting content % by weight
Fe + Si (Iron plus silicon) Other elements[1],each	1 0.1[2]

[1] Other elements are, for example Cr, Cu, Mg, Mn, Ni, Zn.

[2] Copper is permitted in a proportion greater than 0.1% but not more than 0.2%, provided that neither the chromium nor manganese content exceeds 0.05%.

   (b) **Aluminum alloys**

   Metallic substances in which aluminum predominates by weight over each of the other elements, provided that:

   (i) the content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table; or

   (ii) the total content by weight of such other elements exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 1 (c), for the purposes of subheading No. 7616.91 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

Supplementary Notes.

1. In this Chapter the expression "unworked" means:

   (a) when referring to bars, rods and profiles, products which have not been subsequently worked after production (for example, not machined, drilled, punched, twisted or crimped);

   (b) when referring to plates, sheets, strip and foil, products which have not been processed beyond the last rolling mill pass except by heat treating, levelling, edge trimming, slitting, cutting-to-size, surface cleaning or lubricating.

2. In this Chapter the expression "unwrought" means forms which may be simply cut-to-length for shipping or to make the metal suitable for further processing. It also includes scalping or de-scaling surfaces to prepare them for rolling, extrusion or forging.

Chapter 78

LEAD AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading No. 78.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading No. 78.04 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note.

1. In this Chapter the expression "refined lead" means:

   Metal containing by weight at least 99.9% of lead, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE -- Other elements

Element		Limiting content % by weight
Ag	Silver	0.02

ZINC AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling) provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular" cross-section exceeds one-tenth of the width.

(d) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading No. 79.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading No. 79.05 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Zinc, not alloyed**

Metal containing by weight at least 97.5% of zinc.

(b) **Zinc alloys**

Metallic substances in which zinc predominates by weight over each of the other elements, provided that the total content by weight of such other elements exceeds 2.5%.

(c) **Zinc dust**

Dust obtained by condensation of zinc vapour, consisting of spherical particles which are finer than zinc powders. At least 80% by weight of the particles pass through a sieve with 63 micrometres (microns) mesh. It must contain at least 85% by weight of metallic zinc.

Chapter 80

TIN AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading No. 80.01), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading Nos. 80.04 and 80.05 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) **Tin, not alloyed**

Metal containing by weight at least 99% of tin, provided that the content by weight of any bismuth or copper is less than the limit specified in the following table:

TABLE -- Other elements

Element	Limiting content % by weight
Bi Bismuth Cu Copper	0.1 0.4

(b) **Tin alloys**

Metallic substances in which tin predominates by weight over each of the other elements, provided that:

(i) the total content by weight of such other elements exceeds 1%; or

(ii) the content by weight of either bismuth or copper is equal to or greater than the limit specified in the foregoing table.

Chapter 82

TOOLS, IMPLEMENTS, CUTLERY, SPOONS AND FORKS, OF BASE METAL; PARTS THEREOF OF BASE METAL

Notes.

1. Apart from blow lamps, portable forges, grinding wheels with frameworks, manicure or pedicure sets, and goods of heading No. 82.09, this Chapter covers only articles with a blade, working edge, working surface or other working part of:

   (a) Base metal;

   (b) Metal carbides or cermets;

   (c) Precious or semi-precious stones (natural, synthetic or reconstructed) on a support of base metal, metal carbide or cermet; or

   (d) Abrasive materials on a support of base metal, provided that the articles have cutting teeth, flutes, grooves, or the like, of base metal, which retain their identity and function after the application of the abrasive.

2. Parts of base metal of the articles of this Chapter are to be classified with the articles of which they are parts, except parts separately specified as such and tool-holders for hand tools (heading No. 84.66). However, parts of general use as defined in Note 2 to Section XV are in all cases excluded from this Chapter.

   Heads, blades or cutting plates for electric shavers and electric hair clippers are to be classified in heading No. 85.10.

3. Sets consisting of one or more knives of heading No. 82.11 and at least an equal number of articles of heading No. 82.15 are to be classified in heading No. 82.15.

Chapter 83

MISCELLANEOUS ARTICLES OF BASE METAL

Notes.

1. For the purpose of this Chapter, parts of base metal are to be classified with their parent articles. However, articles of iron or steel of heading No. 73.12, 73.15, 73.17, 73.18 or 73.20, or similar articles of other base metal (Chapters 74 to 76 and 78 to 81) are not to be taken as parts of articles of this Chapter.

2. For the purpose of heading No. 83.02, the word "castors" means those having a diameter (including, where appropriate, tires) not exceeding 75 mm, or those having a diameter (including, where appropriate, tires) exceeding 75 mm provided that the width of the wheel or tire fitted thereto is less than 30 mm.

3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines adapted for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.

4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in Chapter 84 or Chapter 85, then the whole falls to be classified in the heading appropriate to that function.

5. For the purpose of these Notes, the expression "machine" means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of Chapter 84 or 85.

Supplementary Note.

1. In this Section the term "mechanically operated" refers to those goods which are comprised of a more or less complex combination of moving and stationary parts and do work through the production, modification or transmission of force and motion.

   (f) Hand-operated mechanical floor sweepers, not motorized (heading No. 96.03).

2. Subject to the operation of Note 3 to Section XVI, a machine or appliance which answers to a description in one or more of the heading Nos. 84.01 to 84.24 and at the same time to a description in one or other of the heading Nos. 84.25 to 84.80 is to be classified under the appropriate heading of the former group and not the latter.

   Heading No. 84.19 does not, however, cover:

   (a) Germination plant, incubators or brooders (heading No. 84.36);

   (b) Grain dampening machines (heading No. 84.37);

   (c) Diffusing apparatus for sugar juice extraction (heading No. 84.38);

   (e) Machinery or plant, designed for mechanical operation, in which a change of temperature, even if necessary, is subsidiary.

   Heading No. 84.22 does not cover:

   (a) Sewing machines for closing bags or similar containers (heading No. 84.52); or

   (b) Office machinery of heading No. 84.72.

   Heading No. 84.24 does not cover:

   Ink-jet printing machines (heading No. 84.43 or 84.71).

3. A machine-tool for working any material which answers to a description in heading No. 84.56 and at the same time to a description in heading No. 84.57, 84.58, 84.59, 84.60, 84.61, 84.64 or 84.65 is to be classified in heading No. 84.56.

4. Heading No. 84.57 applies only to machine-tools for working metal, other than lathes (including turning centres), which can carry out different types of machining operations either:

   (a) by automatic tool change from a magazine or the like in conformity with a machining programme (machining centres),

   (b) by the automatic use, simultaneously or sequentially, of different unit heads working on a fixed position workpiece (unit construction machines, single station), or

   (c) by the automatic transfer of the workpiece to different heads (multi-station transfer machines).

5. (A) For the purpose of heading No. 84.71, the expression "automatic data processing machines" means:

   (a) Digital machines, capable of (1) storing the processing program or programs and at least the data immediately necessary for the execution of the program; (2) being freely programmed in accordance with the requirements of the user; (3) performing arithmetical computations specified by the user; and, (4) executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run;

   (b) Analogue machines capable of simulating mathematical models and comprising at least: analogue elements, control elements and programming elements;

   (c) Hybrid machines consisting of either a digital machine with analogue elements or an analogue machine with digital elements.

   (B) Automatic data processing machines may be in the form of systems consisting of a variable number of separate units. Subject to paragraph (E) below, a unit is to be regarded as being a part of a complete system if it meets all of the following conditions:

   (a) It is of a kind solely or principally used in an automatic data processing system;

   (b) It is connectable to the central processing unit either directly or through one or more other units; and

   (c) It is able to accept or deliver data in a form (codes or signals) which can be used by the system.

   (C) Separately presented units of an automatic data processing machine are to be classified in heading No. 84.71.

   (D) Printers, keyboards, C-Y co-ordinate input devices and disk storage units which satisfy the conditions of paragraphs (B) (b) and (B) (c) above, are in all cases to be classified as units of heading No. 84.71.

   (E) Machines performing a specific function other than data processing and incorporating or working in conjunction with an automatic data processing machine are to be classified in the headings appropriate to their respective functions or, failing that, in residual headings.

6. Heading No. 84.82 applies, *inter alia*, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1% or by more than 0.05 mm, whichever is less. Other steel balls are to be classified in heading No. 73.26.

7. A machine which is used for more than one purpose is, for the purpose of classification, to be treated as if its principal purpose were its sole purpose.

   Subject to Note 2 to this Chapter and Note 3 to Section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading No. 84.79. Heading No. 84.79 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

Supplementary Notes.

1. For purpose of this Chapter, the term "printed circuit assembly", means a good consisting of one or more printed circuits of heading No. 85.34 with one or more active elements assembled thereon, with or without passive elements. For purposes of this Note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading No. 85.41, and integrated circuits and microassemblies of heading No. 85.42.

2. For purposes of subheading No. 8471.49, the origin of each unit presented within a system shall be determined in accordance with the rule that would be applicable to such unit if it were presented separately and the rate of duty applicable to each unit presented in a system shall be:

   (a) in the case of Mexico, the rate that would be applicable to such unit if it were presented separately; and

   (b) in the case of Canada and the United States, the rate that is applicable to such unit under the appropriate tariff item No. within subheading No. 8471.49.

   For the purposes of this Note, the term “unit presented within a system” shall mean:

   (i) a separate unit as described in Note 5 (B) to Chapter 84 of the Harmonized System; or
   (ii) any other separate machine that is presented and classified with a system under subheading No. 8471.49.

3. Tariff item No. 8473.30.10 covers the following parts for printers of subheading No. 8471.60:

   (a) control or command assemblies, incorporating more than one of the following: printed circuit assembly, hard or flexible (floppy) disc drive, keyboard, user interface;

   (b) light source assemblies, incorporating more than one of the following: light emitting diode assembly, gas laser, mirror polygon assembly, base casting;

   (c) laser imaging assemblies, incorporating more than one of the following: photoreceptor belt or cylinder, toner receptable unit, toner developing unit, charge/discharge unit, cleaning unit;

   (d) image fixing assemblies, incorporating more than one of the following: fuser, pressure roller, heating element, release oil dispenser, cleaning unit, electrical control;

   (e) ink jet marking assemblies, incorporating more than one of the following: thermal print head, ink dispensing unit, nozzle and reservoir unit, ink heater;

   (f) maintenance/sealing assemblies, incorporating more than one of the following: vacuum unit, ink jet covering unit, sealing unit, purging unit;

   (g) paper handling assemblies, incorporating more than one of the following: paper transport belt, roller, print bar, carriage, gripper roller, paper storage unit, exit tray;

   (h) thermal transfer imaging assemblies, incorporating more than one of the following: thermal print head, cleaning unit, supply or take-up roller;

   (ij) ionographic imaging assemblies, incorporating more than one of the following: ion generation and emitting unit, air assist unit, printed circuit assembly, charge receptor belt or cylinder, toner receptacle unit, toner distribution unit, developer receptable and distribution unit, developing unit, charge/discharge unit, cleaning unit; or

   (k) combinations of the above specified assemblies.

Chapter 85

ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES

Notes.

1. This Chapter does not cover:

   (a) Electrically warmed blankets, bed pads, foot-muffs or the like; electrically warmed clothing, footwear or ear pads or other electrically warmed articles worn on or about the person;

   (b) Articles of glass of heading No. 70.11; or

   (c) Electrically heated furniture of Chapter 94.

2. Heading Nos. 85.01 to 85.04 do not apply to goods described in heading No. 85.11, 85.12, 85.40, 85.41 or 85.42.

   However, metal tank mercury arc rectifiers remain classified in heading No. 85.04.

3. Heading No. 85.09 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes:

   (a) Vacuum cleaners, floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;

   (b) Other machines provided the weight of such machines does not exceed 20 kg.

   The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading No. 84.14), centrifugal clothes-dryers, (heading No. 84.21), dish washing machines (heading No. 84.22), household washing machines (heading No. 84.50), roller or other ironing machines (heading No. 84.20 or 84.51), sewing machines (heading No. 84.52), electric scissors (heading No. 85.08) or to electro-thermic appliances (heading No. 85.16).

4. For the purpose of heading No. 85.34 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

   The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.

   Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading No. 85.42.

5. For the purpose of heading Nos. 85.41 and 85.42:

   (A) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;

   (B) "Electronic integrated circuits and microassemblies" are:

      (a) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;

      (b) Hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.) obtained by semiconductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

      (c) Microassemblies of the moulded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.

   For the classification of the articles defined in this Note, heading Nos. 85.41 and 85.42 shall take precedence over any other heading in the Nomenclature which might cover them by reference to, in particular, their function.

6. Records, tapes and other media of heading No. 85.23 or 85.24 remain classified in those headings, whether or not they are presented with the apparatus for which they are intended.

7. For the purposes of heading No. 85.48, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

Subheading Note.

1. Subheading Nos. 8519.92 and 8527.12 cover only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

Supplementary Notes.

1. For purposes of this Chapter, "printed circuit assembly" means a good consisting of one or more printed circuits of heading No. 85.34 with one or more active elements assembled on it, with or without passive elements. For purposes of this Note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading No. 85.41, and integrated circuits and microassemblies of heading No. 85.42.

2. For purposes of this Chapter:

   (a) references to "high definition" as it applies to television receivers and cathode-ray tubes refers to goods having

      (i) an aspect ratio of the screen equal to or greater than 16:9, and

      (ii) a viewing screen capable of displaying more than 700 scanning lines; and

   (b) the video display diagonal is determined by measuring the maximum straight line dimension across the visible portion of the face plate used for displaying video.

3. For the purposes of heading No. 85.24, “software” means programs that are recorded on diskettes, compact discs, magnetic tape or any other suitable storage medium and that are designed to be executed by a computer or similar programmable, microprocessor-controlled device or apparatus but does not mean audio or video recordings of a type used with sound recording or reproducing apparatus of heading No. 85.19 or 85.20 or with video recording or reproducing apparatus of heading No. 85.21.

Statistical Notes. (NB These notes do not form part of the Customs Tariff legislation.)

1. For statistical purposes under subheading No. 8539.10, the size of a sealed beam lamp unit is determined by measuring the largest diagonal dimension across the faceplate for rectangular lamp units and the diameter for circular lamp units.

2. For statistical purposes under subheading Nos. 8525.10 and 8525.20, the lowest operating frequency will determine the classification.

3. For the statistical purposes of subheading No. 8544.70 having a unit of measure 'metre', the intention is to capture the total number of metres obtained by multiplying the number of individual fibres by the length.

2. The expressions "parts" and "parts and accessories" do not apply to the following articles, whether or not they are identifiable as for the goods of this Section:

   (a) Joints, washers or the like of any material (classified according to their constituent material or in heading No. 84.84) or other articles of vulcanised rubber other than hard rubber (heading No. 40.16);

   (b) Parts of general use, as defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39);

   (c) Articles of Chapter 82 (tools);

   (d) Articles of heading No. 83.06;

   (e) Machines or apparatus of heading Nos. 84.01 to 84.79, or parts thereof; articles of heading No. 84.81 or 84.82 or, provided they constitute integral parts of engines or motors, articles of heading No. 84.83;

   (f) Electrical machinery or equipment (Chapter 85);

   (g) Articles of Chapter 90;

   (h) Articles of Chapter 91;

   (ij) Arms (Chapter 93);

   (k) Lamps or lighting fittings of heading No. 94.05; or

3. References in Chapters 86 to 88 to "parts" or "accessories" do not apply to parts or accessories which are not suitable for use solely or principally with the articles of those Chapters. A part or accessory which answers to a description in two or more of the headings of those Chapters is to be classified under that heading which corresponds to the principal use of that part or accessory.

4. For the purpose of this Section:

   (a) Vehicles specially constructed to travel on both road and rail are classified under the appropriate heading of Chapter 87;

   (b) Amphibious motor vehicles are classified under the appropriate heading of Chapter 87;

   (c) Aircraft specially constructed so that they can also be used as road vehicles are classified under the appropriate heading of Chapter 88.

5. Air-cushion vehicles are to be classified within this Section with the vehicles to which they are most akin as follows:

   (a) In Chapter 86 if designed to travel on a guide-track (hovertrains);

   (b) In Chapter 87 if designed to travel over land or over both land and water;

   (c) In Chapter 89 if designed to travel over water, whether or not able to land on beaches or landing-stages or also able to travel over ice.

   Parts and accessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the heading in which the air-cushion vehicles are classified under the above provisions.

   Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signalling, safety or traffic control equipment for hovertrain transport systems as signalling, safety or traffic control equipment for railways.

Chapter 87

VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING-STOCK, AND PARTS AND ACCESSORIES THEREOF

Notes.

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.

2. For the purpose of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilizers or other goods.

   Machines and working tools designed for fitting to tractors of heading No. 87.01 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs fall in heading Nos. 87.02 to 87.04, and not in heading No. 87.06.

4. Heading No. 87.12 includes all children's bicycles. Other children's cycles fall in heading No. 95.01.

Chapter 90

OPTICAL, PHOTOGRAPHIC, CINEMATOGRAPHIC, MEASURING, CHECKING, PRECISION, MEDICAL OR SURGICAL INSTRUMENTS AND APPARATUS; PARTS AND ACCESSORIES THEREOF

Notes.

1. This Chapter does not cover:

   (a) Articles of a kind used in machines, appliances or for other technical uses, of vulcanised rubber other than hard rubber (heading No. 40.16), of leather or of composition leather (heading No. 42.04) or of textile material (heading No. 59.11);

   (b) Supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (Section XI);

   (c) Refractory goods of heading No. 69.03; ceramic wares for laboratory, chemical or other technical uses, of heading No. 69.09;

   (d) Glass mirrors, not optically worked, of heading No. 70.09, or mirrors of base metal or of precious metal, not being optical elements (heading No. 83.06 or Chapter 71);

   (e) Goods of heading No. 70.07, 70.08, 70.11, 70.14, 70.15 or 70.17;

   (f) Parts of general use, as defined in Note 2 to Section XV, of base metal (Section XV) or similar goods of plastics (Chapterº39);

   (g) Pumps incorporating measuring devices, of heading No. 84.13; weight-operated counting or checking machinery, or separately presented weights for balances (heading No. 84.23); lifting or handling machinery (heading Nos. 84.25 to 84.28); paper or paperboard cutting machines of all kinds (heading No. 84.41); fittings for adjusting work or tools on machine-tools, of heading No. 84.66, including fittings with optical devices for reading the scale (for example, "optical" dividing heads) but not those which are in themselves essentially optical instruments (for example, alignment telescopes); calculating machines (heading No. 84.70); valves or other appliances of heading No. 84.81;

   (h) Searchlights or spotlights of a kind used for cycles or motor vehicles (heading No. 85.12); portable electric lamps of heading No. 85.13; cinematographic sound recording, reproducing or re-recording apparatus (heading No. 85.19 or 85.20); sound-heads (heading No. 85.22); still image video cameras and other video camera recorders (heading No. 85.25); radar apparatus, radio navigational aid apparatus or radio remote control apparatus (heading No. 85.26); sealed beam lamp units of heading No. 85.39; optical fibre cables of heading No. 85.44;

   (ij) Searchlights or spotlights of heading No. 94.05;

   (k) Articles of Chapter 95;

   (l) Capacity measures, which are to be classified according to their constituent material; or

   (m) Spools, reels or similar supports (which are to be classified according to their constituent material, for example, in heading No. 39.23 or Section XV).

2. Subject to Note 1 above, parts and accessories for machines, apparatus, instruments or articles of this Chapter are to be classified according to the following rules:

   (a) Parts and accessories which are goods included in any of the headings of this Chapter or of Chapter 84, 85 or 91 (other than heading No. 84.85, 85.48 or 90.33) are in all cases to be classified in their respective headings;

   (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of heading No. 90.10, 90.13 or 90.31) are to be classified with the machines, instruments or apparatus of that kind;

   (c) All other parts and accessories are to be classified in heading No. 90.33.

3. The provisions of Note 4 to Section XVI apply also to this Chapter.

4. Heading No. 90.05 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this Chapter or Section XVI; such telescopic sights and telescopes are to be classified in heading No. 90.13.

5. Measuring or checking optical instruments, appliances or machines which, but for this Note, could be classified both in heading No. 90.13 and in heading No. 90.31 are to be classified in heading No. 90.31.

6. Heading No. 90.32 applies only to:

   (a) Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled; and

   (b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled.

Supplementary Notes.

1. For the purpose of this Chapter, the term "printed circuit assembly" means a good consisting of one or more printed circuits of heading No. 85.34 with one or more active elements assembled thereon, with or without passive elements. For the purpose of this Note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading No. 85.41, and integrated circuits and microassemblies of heading No. 85.42.

2. For the purpose of the tariff items of this Chapter, the term "electrical" when used in reference to instruments, appliances, apparatus and machines, refers to those articles the operation of which depends on an electrical phenomenon which varies according to the factor to be determined.

Statistical Note. (NB This note does not form part of the Customs Tariff legislation.)

1. For the statistical purposes of subheading No. 9001.10 having unit of measure 'metre', the intention is to capture the total number of metres obtained by multiplying the number of individual fibres by the length.

Chapter 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes.

1. This Chapter does not cover:

   (a) Clock or watch glasses or weights (classified according to their constituent material);

   (b) Watch chains (heading No. 71.13 or 71.17, as the case may be);

   (c) Parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading No. 71.15); clock or watch springs are, however, to be classified as clock or watch parts (heading No. 91.14);

   (d) Bearing balls (heading No. 73.26 or 84.82, as the case may be);

   (e) Articles of heading No. 84.12 constructed to work without an escapement;

   (f) Ball bearings (heading No. 84.82); or

   (g) Articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).

2. Heading No. 91.01 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of heading Nos. 71.01 to 71.04. Watches with case of base metal inlaid with precious metal fall in heading No. 91.02.

3. For the purpose of this Chapter, the expression "watch movements" means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.

4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.

WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES

Chapter 97

WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES

Notes.

1. This Chapter does not cover:

   (a) Unused postage or revenue stamps, postal stationery (stamped paper) or the like, of current or new issue in the country to which they are destined (Chapter 49);

   (b) Theatrical scenery, studio back-cloths or the like, of painted canvas (heading No. 59.07) except if they may be classified in heading No. 97.06; or

   (c) Pearls, natural or cultured, or precious or semi-precious stones (heading Nos. 71.01 to 71.03).

2. For the purpose of heading No. 97.02, the expression "original engravings, prints and lithographs" means impressions produced directly, in black and white or in colour, of one or of several plates wholly executed by hand by the artist, irrespective of the process or of the material employed by him, but not including any mechanical or photomechanical process.

3. Heading No. 97.03 does not apply to mass-produced reproductions or works of conventional craftsmanship of a commercial character, even if these articles are designed or created by artists.

4. (a) Subject to Notes 1 to 3 above, articles of this Chapter are to be classified in this Chapter and not in any other Chapter of the Nomenclature.

   (b) Heading No. 97.06 does not apply to articles of the preceding headings of this Chapter.

5. Frames around paintings, drawings, pastels, collages or similar decorative plaques, engravings, prints or lithographs are to be classified with those articles, provided they are of a kind and of a value normal to those articles. Frames which are not of a kind or of a value normal to the articles referred to in this Note are to be classified separately.
